TO WHOM IT MAY CONCERN

Dear Potential Client,

It's my pleasure to recommend UTILIS technology for identifying fresh water leaks by analyzing radar satellite imagery for any water supply system management.

The project we conducted was 2017/2018 in Albstadt, Baden-Württemberg, Germany in 960 KMs.

I thoroughly enjoyed my time working with UTILIS and came to know it as a valuable asset for the management team. UTILIS technology is helpful in reducing time to find leaks.

UTILIS technology with knowledge of geophysics and SAR expertise was a huge advantage to our entire company. Representatives of UTILIS technology put skillset to work in order to teach our field teams to be more efficient in finding leaks on field.

Please feel free to contact me at frank.tantzky@albstadtwerke.de should you like to discuss UTILIS technology. I'd be happy to expand on my recommendation.

Best wishes,

Ihre Albstadtwerke GmbH
